

# The Mulching Lawn Mower

## Reasons to invest in a mulching lawn mower

- ◆ Designed to leave behind finely shredded grass clippings, which serve as mulch. By contrast, lawn mowers without mulching capabilities produce clippings that are bulky and readily mat together. These clippings may need to be removed from the lawn to prevent suffocation of grass below them.
- ◆ No need to bag grass clippings.
- ◆ Easier lawn care.
- ◆ River friendly.

Little Tikes Little  
Landscaping Mulching Mower

The alternative to a mulching lawn mower is a lawn mower that comes with a bag attachment to collect grass clippings. These grass clippings should be deposited into a compost pile.
